We co-operate with the transport masters, whenever they are, at the right place, at the right time and with the best quality and dispatch.

## THE DEPARTMENT OF QUALITY CONTROL SAFETY/SUBMITTALS

The department of quality control/safety/submittals is one of the company's most important departments which primarily is responsible to ensure the quality of products of services, ascertain that safety rules and regulations are strictly enforced on job-site at all levels and to take care of all submittals and approvals.

Maintaining accurate documentation and preparing daily inspection reports is another important function the department members perform on daily basis.

The inspection reports are kept on all tools, equipment and machinery, as well as records and results of product sampling and testing.

This is done with the help of small teams who ensure that quality production and performance standards required by the client and the copy are met.

These teams are appointed and managed by our quality control managers which are responsible for keeping the workers motivated and providing clear performance standards for the team to follow. The other important responsibility of our QC/Safety/Submittal department is strictly asked to performed is to troubleshoot and investigate reasons for poor-quality product and avoid any future repetitions.

Our quality teams work independent of our project management and field superintendents in order to maintain strict quality controls without a conflict of interest.

## DEPARTMENT OF BUSINESS DEVELOPMENT

The department of business development plays important role in the company's economic viability, because it can substantiate, initiate and support projects which involves all other departments and can improve the company's performance.

The Business development department supports and guides the company's strategic planning, influences short-term and long-term goal setting and provides information for effective decision making in company management.

The department ensures stable and dynamic development of the company through the identification and realization of various business and organizational opportunity, market assessment, developing strategic relationships and alliances with other companies and improving and expanding mutual business relationships with clients.

## DEPARTMENT OF PROPOSAL DEVELOPMENT

The department of proposal development develops and puts in proper order all necessary documents required for a technical proposal package.

The documents needed are illustrated in RFP's and often times pertain to, but not limited to, information related to the experience of the offering party, project management, key personnel and past performance.

The department provides necessary information along with enough explanation and proofs.

Other documents such as quality control plan, safety plan, activities/time schedule, cost schedule, design/calculations and drawings as well as documents showing the company's financial stability are categorized first and sent out to the relevant sections to be prepared.

Upon receipt of these documents contain sufficient and relevant information which can answer all the queries of the client.

Since the proposal development department is responsible for the technical and cost proposals, the department will then review the cost schedule as well as the activities/time schedule, bearing in mind the company's strengths and resources.

The department also takes care of all communications before and after the proposal submission and reports directly to the program manager and to the CEO.

## DEPARTMENT OF MAINTENANCE/SUPPLY LOGISTICS

The department of maintenance/supply logistics is primarily responsible to offer maintenance and warranty services for the implemented projects for the period of one year effective from competition date of the projects as well as other maintenance projects.

The department also provides logistic services for all of Cursor Logistic Services on-going projects from construction materials to machinery/equipment and labors.

In addition, the department has the responsibility to check and make sure that all office supplies (computers/printing machines etc.) within our main headquarter in Kabul and branches all over the county, are in good condition and properly functioning.

The department will frequently need to access the regional security situations and provide security to the logistic convoys, if necessary.
